Learning Opportunity

This intense two day course is intended to provide those without a background in Level B testing (e.g. WIAT, Woodcock-Johnson, PPVT, KeyMath and many more) the core training to do that kind of testing following well-established international standards. For those who have already done some Level B testing, this course will "refresh you" or help you understand some of the key concepts you might not be completely clear on. Topics like raw score conversions, confidence intervals, reliability and validity of test scores, observed scores, which score transformations are best and for what uses, etc. will be covered. Throughout, the instructor will try to make the course both practical and interesting - using lots of examples and answering questions. Learners will receive a detailed handout package for the course on which notes and examples will be recorded.

A course like this can be rather dry and boring - but Dave will leave no stone unturned in trying to make it easy to understand, relevant and above all practical and enjoyable.

Presenters

Dr. Dave Carter

Dave Carter has worked in education for 45 years. He has been a classroom teacher (grades six and seven) a Learning Assistance Teacher (grades K - seven) and a school psychologist working in both regular schools and in a specialized program for children with severe autism. He earned both a bachelor and masters degree in education and then a doctorate in educational psychology and special education from U.B.C.

Dave then went on to teach at the university level (graduate and undergraduate) and has taught for UBC, Simon Fraser, San Diego State, the University of Victoria, Royal Roads and Trinity Western. He became Director of Special Education in the Central Okanagan School District and then Director of Instruction for the Surrey School District. Now "retired" he continues to teach graduate courses for both Trinity Western and SFU and has supervised both masters and doctoral level students doing their research in special education. He has consulted to the government of B.C., a number of school districts, done research in China, and provided "expert witness" testimony at the Provincial Supreme Court Level. He and his wife Sharon have four children (all married) and three grandchildren (all girls). They love travelling, their Boxer Dog, taking long walks, providing free babysitting and sailing.
